| <b>3</b> | <b>Variable naming</b>           | <b>3</b> |

## Chapter 1

# Overall Design Philosophy

## Chapter 2

# Files

Directory Structure:

- Try to stick to standard names that other projects use (src, doc, etc.)

File names:

- No capitol letters
- Use underscores to between words
- Names should be short but descriptive (less than 25 characters)
- Source term files should start with “calc\_”

## Chapter 3

# Variable naming
